

PRACTICAL ADVICE FROM REAL LAWYERS

The law affects almost everything we do, yet not everything requires a lawyer. How do you know when you can go it alone or when you really need legal help? That's where Real Life Legal™ comes in.

Real Life Legal™ books are written by lawyers who know from experience the questions people most want answered. And they answer them so readers can quickly and confidently decide the best course of action. This past September, **Real Life Legal™: Practical Advice from Real Lawyers** launched with ten titles on [Amazon.com](https://www.amazon.com). And new books are being added all the time!

At Real Life Legal™, we deliberately crafted short concise books to avoid information overload found in many books out there. Who needs a legal self-help book that's over 300 pages? None of our books is longer than 100 pages because we know time is precious. Each book makes it easy for readers to:

- Understand an every day legal concern.
- Know when it's important to hire a lawyer.
- Get additional resources to dig deeper if they want.

After thirty years on the frontlines of fielding legal questions and explaining how legal things work, I founded Real Life Legal™ because I know how important it is for people to understand their situations and yet how difficult it can be even in a one-hour consult. With concerns about legal fees and the law getting more complex, Real Life Legal™ provides an easy solution.

At Real Life Legal™ we help people know what they need to know, before they opt-in for legal fees that they may not need or cannot afford. We want our readers to avoid legal costs if they can, but get counsel when they really need it.

We also provide a special rate for organizations or associations who are interested in providing a customized or private label book for their membership. You can contact us at info@reallifelegal.com for more information.
